SUMMARY

AI engineer who builds and deploys AI agents that do real work inside a business. Founder of Nexora (since 2024) and freelancer for clients in the US, UAE and other markets. I put business rules in code rather than in prompts, and every agent I build ships with tests, evals, guardrails and an audit trail. Six agents are live with public demos, 94 unit tests and 160 measured eval cases.

EXPERIENCE

Founder & Lead AI Engineer 2024 - Present
Nexora · Islamabad

- Founded Nexora to design, build and deploy AI agents and automation for businesses.
- Own the full cycle: discovery with the client's team, architecture, integrations, evaluation, rollout and handover.

Freelance AI Agent Developer 2024 - Present
Remote · clients in the US, UAE and other markets

- Build AI agents, workflow automations and full-stack web apps, from first scoping call to production.
- Work across time zones in English, Arabic and Urdu.

LIVE AGENT PROJECTS · ALL WITH PUBLIC DEMOS

Relay · AI customer support `relay-support-agent.vercel.app`
Four languages, two channels. Refund limits, identity checks and approvals enforced in code; injection-resistant; signed state. **29/29 rule tests.**

Gatekeeper · MCP security gateway `gatekeeper-mcp-gateway.vercel.app`
Auth, scopes, read-only SQL guard, PII masking, injection filter, approvals, audit log. **40/40 attacks stopped, 9/9 legit calls allowed.**

Compass · knowledge assistant (RAG) `compass-knowledge-assistant.vercel.app`
Permission filtering before retrieval, stale-policy exclusion, verified citations. **100% recall, 0 access leaks.**

Leadline · speed-to-lead sales agent `leadline-speed-to-lead.vercel.app`
Qualifies, enriches and books meetings on email or WhatsApp with time-zone-safe scheduling. **26/26 rule tests.**

Ledger · accounts payable agent `ledger-ap-agent.vercel.app`
3-way match, duplicates, bank-detail fraud, price creep, VAT and approval limits. **30/30 control decisions correct.**

Verity · fair CV screening copilot `verity-recruiter-copilot.vercel.app`
Redaction before the model, evidence-only scoring, bias audit (four-fifths rule). Reviewed by a privacy expert; all 10 recommendations implemented. **39/39 integrity cases.**

SKILLS

AI & agents	Claude API (tool use, structured outputs, prompt caching), Model Context Protocol (MCP), multi-step agents, RAG and retrieval, evals, guardrails, prompt-injection defence
Backend	Python, FastAPI, TypeScript, Node.js, SQL, REST APIs
Frontend	Next.js, React, Tailwind CSS, Three.js
Quality	pytest, eval suites, counterfactual fairness tests, audit logging, PII redaction
Delivery	Vercel, Git and GitHub, CI-friendly test suites

TRAINING

- **GIAIC**: Agentic AI Development, AI Agents, Full-Stack Development
- **PIAIC**: Agentic AI Development, Digital FTE, Full-Stack Development

CERTIFICATIONS

- Anthropic Academy: Claude courses `in progress`
- Claude Certified Associate: Foundations `in progress`

LANGUAGES

English · Arabic · Urdu

Portfolio, live demos and source code: github.com/tahirbaba · All six demos use fictional companies and data; every result above is measured by the project's own test suite.
